TECHNOLOGY CENTER 1700

PRELIMINARY AMENDMENT

Commissioner for Patents Washington, D.C. 20231

Dear Sir:

In response to the Final Office Action dated June 11, 2001 and prior to the examination of this application, please enter the following amendments and consider the following remarks:

AMENDMENTS

In The Claims, Please Amend Claims 1 And 7 As Follows:

1. (Twice Amended) An apparatus for forming a continuous sheet from a molten, viscous material comprising:

a pump connected to an inlet to pump said molten, viscous material under

a discharge manifold, said manifold having a hollow interior chamber, said chamber having at least one inlet for receiving said molten, viscous material from said pump and a discharge opening on at least one side for discharging said molten, viscous material, and a roller;

a casting line positioned downstream of said discharge manifold and comprising an endless casting belt that transports said molten, viscous material upon said casting belt;
